Why Orlaco?

Welcome to the Orlaco product catalogue. We are personally committed to bringing you the best camera and monitor solutions possible. To help create safer and more secure workplaces around the world. Our professional team has spent over twenty-five years designing and manufacturing a variety of certified, reliable and complete camera display solutions that effectively eliminate the blind spots around vehicles, machinery and vessels. We are confident that the options offered in this catalogue will not only help you to improve the safety, security and efficiency of your fleet, but also to enhance the ergonomics and comfort for your operators. That is what Orlaco stands for. We invite you to share your ideas and experiences with us.

On behalf of the entire team,
Henrie van Beusekom
Executive Director Orlaco

That's
why!

Quality

Why Orlaco

Emergency vehicles are complex machines that require clear vision which allows the operation to progress smoothly and safely. Especially when an emergency attracts a large audience and or press, maneuvering into a correct position is not an easy task. Drivers have minimal vision around the vehicle. It is essential to solve large blind spots in a professional matter. This is where Orlaco's camera monitor solutions will help to improve operational efficiency and safety. Together with our zoom and/or thermal imaging cameras on the basket, analyzing the overall situation will go much faster and efficient.

A driver of an emergency vehicle is required to follow what is occurring around his vehicle. Frequently he must maneuver into a contorted position. The vehicles are reversing repeatedly. The driver is obliged to turn his body to overview the operation, possibly leading to short or even long term ergonomic injuries. By viewing the Orlaco monitor located on the dashboard, the driver can maintain correct posture and work more comfortably. He feels safe, secure and in control of the vehicles' environment, reducing stress and providing comfort.

At Orlaco, quality is never taken lightly. We keep a clear and persistent focus on customer satisfaction. A focus that is maintained throughout the manufacturing process of our quality products, which are custom designed in various formats. We are able to uphold our level of quality by providing detailed servicing. To top it all off, we have secured the highest achievable automotive certification: TS16949. At Orlaco, we invest in continuous improvement in order to secure a long term, satisfied customer base. We believe that compatibility in products, systems, and operations is the key element to creating reliable partnerships. All our products are controlled and clearly documented to give our customers a zero-defect product with operation that works right, every time.

Why Orlaco

Emergency sight solutions

Cage-cam

CC2000 - PAGE 15

CC1000 - PAGE 14

Aerial appliances or ladder trucks are used to provide the most effective location possible for extinguishing fires. This has one disadvantage: It is difficult to follow operations from the ground. The safe and effective use of the aerial appliance or ladder truck therefore depends on the viewing system. Orlaco can help you get the best possible view using a camera system.

Frontview

FC1001 - PAGE 18

The new EU mirror directive came into force in 2006 and was extended in January 2007. It includes frontview mirrors for all new trucks in Europe. Only an approved camera system may replace the front view mirror. The front camera provides a perfect view of the blind spot in front of the cab. This makes it possible to notice cyclists and pedestrians in time.

Vision solutions

Mastcam

MC1101 - PAGE 14

Being able to see the people working in the basket cannot be taken for granted, especially if you are working above or behind high buildings or objects where the basket will be out of sight. With the mast camera, you will always be able to see them. That is a prerequisite for wellcoordinated collaboration and maximum safety.

Rearview

RC1001 - PAGE 18

The rearview camera helps you get your vehicle into the correct position quickly and safely. Especially when reversing, you enjoy improved visibility. This is more efficient for you and it can improve safety for bystanders. **Recommendation:** Add RadarEye to increase safety & efficiency. (see page 28-29)

Vision solutions

Frontview- TIC

FF1000 - PAGE 15

Fighting a forest fire is a tough job. Accessibility is limited and unclear especially when combined with heavy smoke development. Using a thermal imaging camera on a Pan & Tilt unit on the front of the vehicle, together with a rearview camera, helps you to better overcome these obstacles.

Rearview

FF1000 - PAGE 15

Orlaco equips your forest fire engine with a rearview camera. This camera provides you with a view of the area directly behind the vehicle. This allows you to reverse more safely, not only in traffic, but also in forest areas, which are often difficult to access.

Rearview

The rearview camera lets you see the area immediately behind the crash tender. This is safer when you are on the way to the location and ideal when you are moving your vehicle into position.

Runway-cam

With the camera system recommended by the Federal Aviation Administration (FAA) (AC No: 150/5210-19A), consisting of a thermal imaging camera and a zoom camera on the roof of the vehicle, you can fight fires more effectively as a result of your improved visibility. In addition, you can record these images digitally with the integrated recorder. That can be an important function when analyzing the disaster. This set is also fitted with rearview and sideview cameras.

[●REC]

Sideview

Given the dimensions of the crash tender and your position as the driver, adequate visibility is not something you can take for granted. The side cameras give you greater visibility of the areas to the sides of the vehicle.

Information

Crash tenders are large, cumbersome vehicles. An Orlaco camera system is a welcome addition. You can easily combine this with a thermal imaging camera and a zoom camera. These DEVS (Driver's Enhanced Vision Systems) for ARFF (Aircraft Rescue and Fire Fighting) are recommended by the FAA. Two cameras are positioned on the Pan & Tilt unit. The zoom camera, capable of up to 432X zoom, lets you see the

location and brings objects into crystal-clear focus. The thermal imaging camera helps you see through the smoke to localize the seat of the fire. You can view the images from both the zoom and thermal imaging cameras and the side- and rearview cameras on the monitor in the cab.

Rearview

The rearview camera increases the safety of professional response personnel and bystanders. You can maneuver more easily because you can see the area behind the vehicle. The monitor in the cab automatically switches over to the rearview camera if you select reverse gear.
Recommendation: Add RadarEye to increase safety & efficiency. (see page 28-29)

Frontview

The new EU mirror directive came into force in 2006 and was extended in January 2007. It includes frontview mirrors for all new trucks in Europe. Only an approved camera system may replace the front view mirror. The front camera provides a perfect view of the blind spot in front of the cab. This makes it possible to notice cyclists and pedestrians in time.

FR1001 - PAGE 18

- INFORMATION**
The frontview mirror may be replaced by a front camera provided it meets, among others, the following requirements:
- Mandatory front vision at forward speeds of between 0 and 10km per hour.
 - It must be possible to see the class VI field of vision. (2m in front of and 2m across the entire width of the cab)

- The monitor may only display the class VI field of vision at forward speeds of between 0 and 30km per hour.
- The monitor and camera must meet all technical requirements.

The EG*2003/97*2005/27 directive describes the specifications that a truck's mirrors must comply with. Orlaco's front view system meets all these requirements.

Note: Example of design, contact Orlaco for the required cable lengths.

Surround view

- Surround view can be applied on any type of vehicle.
- Increased visibility when manoeuvring in narrow spaces and crowded areas.
- Images available: 180°, 270° or 360°.
- Surround view offers an overview of objects and people around a vehicle. They are always visible, thanks to overlapping camera images.
- Suitable for both 7" and 12" Orlaco monitors.
- Operating temperature between -40° and +85°C.
- A maximum of four different overviews can be programmed.
- No time-consuming calibration of cameras.
- Surround view can be designed and programmed in accordance with the customer's wishes.
- Contact Orlaco for more information and advice.

The dimensions and design of emergency vehicles make it difficult for a driver to have a complete overview of the situation. Surround View gives a three hundred and sixty degrees visibility around the vehicle, enabling the driver to maneuver safely under the most difficult and hectic circumstances. The positioning of the vehicle is often essential in order to attend to emergency situations on time in a safe and efficient way. The system shows a maximum visibility of all four sides of the vehicle on one monitor. The camera images overlap, allowing the driver to have a complete overview at all times, without missing any obstacles. By providing the driver an immediate clear overview of the situation, Surround View significantly increases safety and efficiency.

Forward manoeuvring

Reverse mode

Or design your system yourself

- Step 1:** Select your camera
 - Step 2:** Select your desired cable
 - Step 3:** Select your monitor
 - Step 4:** Select the required options
- It is also possible to configure your system online on our website: www.oralco.com

Whatever you select, the system can be easily installed and is plug-and-play.

Note: For two or more cameras a switcher, 4Cam RLED Monitor or MultiView Box and additional cables are required. Contact us for support.

The qualifications of our AMOS and FAMOS Compact Cameras

- Next generation CMOS sensor
- Light sensitivity 0.05 lux
- Integrated *Safety ticker* to show that camera is running and active
- Impact and vibration proof
- Operating temperature between -40°C to +85°C
- Heated lens glass, therefore no problems with condensation or frost
- Fixed lens
- IP68 dust- and waterproof according to IEC 60529
- The camera has a 0,5m cable including a waterproof molded 4p connector male

Johnson's Criteria

The Johnson's criteria defines what is meant by "seeing a target". The minimum required resolution according to Johnson's criteria are expressed in terms of image resolution across a target, in terms of several tasks: Detection (4px), Recognition (16px) and Identification (26px). The measurements are based on optimal conditions with an object size of 2.3m x 2.3m and are theoretical. Practical situations may deviate.

118° MIRROR	0400160	0400260

- Including control unit for Input/Output ATVC
- Excluding water pump with 6 liter reservoir (3500810)
- Excluding water hose (2270140)
- Excluding extension cable camera to Input/Output ATVC

The qualifications of our zoom cameras

- Operating temperature between -40°C to +85°C
- Built-in brightness function to ensure better visibility on dark areas
- 432x zoom, 1,7° to 48° horizontal opening angle
- Built-in night vision function (0 lux mode)
- Nitrogen-filled housing, 100% watertight (IP 69K)
- Heated lens glass, therefore no problems with condensation or frost
- Shock and vibration resistant

AF-Zoom Cameras

- Power supply 12V - 24V/DC when cable is <50m
Power supply 18V - 24V/DC when cable is >50m
- 2,6kg
- Dimensions: 260x140x122mm (without bracket)

0103531 AF-Zoom Camera Serial

- Including 6m multi cable fitted with 7p connector (female)

0103511 AF-Zoom Camera Hard wired

- Including 5,1m multi cable (1220250)

Thermal Imaging Camera

- Thermal Imager Uncooled VOx microbolometer
- 25° lens (up to 450m detection)
- 12-30V/DC max 8W
- 2x and 4x zoom

0103730 TIC-camera 320 9Hz

- Including 6m multi cable fitted with 7p connector (female)

0103740 TIC-camera SSt

- Including 5,1m multi cable

The qualifications of our Pan & Tilt Zoom Cameras (PTZ)

- Operating temperature between -40°C to +85°C
- Built-in brightness function to ensure better visibility on dark areas
- 36x optical zoom, 1,7° to 48° horizontal opening angle
- Built-in night vision function (0 lux mode)
- Nitrogen-filled camera housing, 100% watertight (IP 69K)
- Heated lens glass, therefore no problems with condensation or frost
- Shock and vibration resistant
- Dimensions: HxWxD 284x307x141mm
- Including 5m cable with 7p connector
- 6 presets for camera positions
- Pan angle 360° (180° to left, 180° to the right)
- tilt angle 180° (90° up, 90° down)
- Pan & tilt speed 12,5°/sec
- Power supply 18V to 30V/DC

Pan & Tilt Zoom Camera

0506952 PTZ Camera Aluminium PAL

0506961 PTZ Camera Aluminium NTSC

- Aluminium housing
- Weight: 5kg (including 5m cable)

Pan & Tilt Thermal Image Camera

0506971 PT TIC Camera Aluminium

0506981 PT TIC Camera SSt

- Weight: 6,8kg (including 5m cable)

The advantages of Orlaco cables

- All cables are specially developed by Orlaco
- Special cables are available for various circumstances such as severe off-road conditions
- Resistant to oil and petrol
 - Watertight cable connectors
 - Operating temperature -40°C to +85°C

Multi cable standard

This standard cable can be used if no special requirements like mechanical protection or dynamic movement of the cable is needed.

Including 4p molded connectors:

0301960	1m	0301870	2m
0301890	3m	0301880	5m
0301910	7,5m	0301930	8m
0301950	9m	0301900	11m
0301920	16m	0301940	21m
0301990	40m		

Including 7p molded connectors:

0304420	0,5m	0304260	2m
0304410	6m	0304610	11m
0304620	16m	0305030	21m

Dynamic cable

Suitable for dynamic use, for instance for a Toolcam mounted on an arm or dipper stick, an excavator boom or in the between the moving part of an articulated dumptruck.

- Soft cover with small bend radius

Including 4p molded connectors:

0304371	0,5m	0304281	1m
0305341	3,5m	0304341	5m
0304381	6m	0304391	8m
0304431	9m	0304441	10m
0301811	11,2m	0304451	12m
0301731	15m	0301831	20m

Including 7p molded connectors:

0304460	3m	0304470	4m
0304480	5m	0304490	8m
0304560	9m	0304570	10m
0304580	11m	0304590	17m

Cable per metre (connectors not included)

1220170	Multi cable 1x coax + 5x wire
1220250	Multi cable 1x coax, 12x wires PUR
1220280	Multi cable armored 1x coax, 5x wire
1220350	Multi cable 2x coax + 5x wire PUR
1220600	Dynamic cable 1x coax 5x wire PUR
1220900	Power Multi cable 7x wire AWG20
1222000	Coaxcable 75 Ohm RG50

Any required connectors can be ordered separately (page 25).

- Recommended for dynamic and armored cable

Adapter cables

0304000 Adapter cable 4p female - 4p female

0304050 Adapter cable 4p male - 4p male

0304210 Adapter cable 4p female - 7p male

0304220 Adapter cable 4p male - 7p female

Interface cables

To connect an Orlaco Compact Camera to a third party monitor.

0303860 Interface cable 4p female - BNC

0303770 Adapter cable 4p female - Cinch

0303810 Adapter cable 4pF - Volvo ECU Uni

0303830 Adapter cable 4pF - Scania Interactor

0303090 Adapter cable 4pF - Bosch (MAN/DAF/SCANIA) radio

0304660 Adapter cable 4pF - Mercedes-Benz radio/navigation

0304990 Adapter cable m4F - VOLVO FH4

0304870 Adapter cable m4F - r4M MAN Monitor

The possibilities offered by Orlaco LED monitors

- Automotive 7inch TFT liquid crystal display module, LED backlight
 - Operating temperature between -40°C to +85°C
 - Impact and vibration resistance meet the stringent requirements
 - High resolution pixel WVGA 800xRGBx480
- Power protected against:
 - Induction voltages
 - Load dumps
 - Over- and undervoltage
 - Mirror image setting
 - Brightness automatically adjusts to the ambient light
 - Integrated sun visor
- Option of a marker line per camera on the screen for the optimum determination of distance
 - IP67 according to IEC 60529
 - Full On-Screen-Display (OSD) in 12 languages
 - Watertight molded connectors

Monitor 7" RLED (Incl. 132mm bracket)

Standard bracket

Monitor 12" RLED (Incl. 190mm bracket)

Monitors RLED

- Input Voltage 12...60V/DC +/-10%

Type	Video cable / connector	Power cable	Bracket	Art. no.
7"	2m / 4p female	2m open wired	132mm	0208603
7" Serial	6m / 7p female	6m open wired	132mm	0208632
7" Serial	6m / 7p female	6m open wired	standard	0208691
7" CAN SRD	6m / 7p female	6m open wired	132mm	0208871
12"	4m / 4p female	4m open wired	190mm	0411000
12" Serial	6m / 7p female	6m open wired	190mm	0411130
12" CAN SRD	6m / 7p female	6m open wired	190mm	0411300

- Input Voltage 18...30V/DC +/-10%

7"	2m / 4p female	2m open wired	132mm	0223000
7"	4m / 4p female	4m open wired	standard	0223100

Monitors LLED

- For double DIN slide opening in the dashboard
- Input Voltage 12...60V/DC +/-10%

Type	Video cable / connector	Power cable	Bracket	Art. no.
7"	2m / 4p female	2m open wired	-	0208203
7" Serial	6m / 7p female	6m open wired	-	0208232
7" CAN SRD	6m / 7p female	6m open wired	-	0208371
• Input Voltage 18...30V/DC +/-10%				
7"	2m / 4p female	2m open wired	-	0221000

Serial For serial connection (Zoom- & TIC cameras or MultiView box)

CAN SRD Specially designed for RadarEye systems. (see page 28-29)

0210501 Monitor 7" LEDD Serial + Keyboard

- Aluminium/stainless steel housing
- 10p Harting connection

Switchers

Input and power supply for three cameras and in combination with a Y-split cable: four cameras.

- Cameras can be switched over automatically or manually

0404040 Switcher UNI

- Waterproof IP54 according to IEC 60529
- 4p output for monitor

0404060 Switcher Serial

- Waterproof IP67 according to IEC 60529
- 7p output for monitor
- Only in combination with a Serial monitor
- Possibility to connect 1 serial Orlaco camera (AF Zoom)

0404080 Switcher UNI IP67

- Waterproof IP67 according to IEC 60529
- 4p output for monitor

0404070 Switcher 4Cam

This video switcher for third party monitors has 4 video inputs and 1 video output

- Connect up to 4 cameras (PAL or NTSC) to a third party monitor
- Including 3,85m power cable

Multiview split

The Multiview box is an advanced video imaging system for up to 4 cameras. There are many possibilities of different split views in 5 selectable video channels.

Through the menu of the Orlaco Serial monitor, the Multiview box can be programmed to show any desired lay-out of views from the connected cameras. Once programmed, the Multiview box will retain these settings even when power is completely disconnected. Different views can be shown on the screen using the standard switching features without the need for further programming.

- Stainless steel housing
- Serial Orlaco Monitor needed (A regular non Serial Orlaco monitor can be connected to the Multiview box via a 7-to-4-pin adapter cable (0304220), please contact your dealer for further advice)

0404110 MultiView box

- 4 camera inputs (4x Compact Camera)

0404120 MultiView box

- 4 camera inputs (3x Compact Camera 1x AF-Zoom Camera)

RadarEye unites visibility and active detection

Orlaco has developed this radar unit in addition to the camera-monitor systems. By combining the vision solution with an active signaling system, RadarEye offers additional safety and efficiency.

RadarEye is an integrated active view system designed to detect and see objects in zones obscured from the operator's view. The radar system detects stationary as well as moving objects in a designated coverage area. With this view system the operator is actively warned with audible tones that increase in rate as objects come closer. When an object is detected it can be seen on the monitor and the operator can respond immediately. This prevents damage to the operators machine and any other equipment he may reverse into. The radar units have a rugged design, are shockproof, waterproof and is not influenced by the environment, such as snow, rain, mud and or temperature changes.

- RadarEye can be used on various trucks
- RadarEye is capable of visualizing the radar-zones on the display, as soon as a person enters the zone it will activate colored dots (default setting) or a transparent visualization (standard/custom preset settings) to make the driver aware of the potential danger
- 2...20m detection area, divided in 5 equally sizes segments
- Separation distance: 1-4m (configurable)
- Antenna beam horizontal: 70°(typ.), vertical: 11°(typ.)
- Operating temperature between -40°C to +85°C
- Obstacle reaction delay 50ms
- Orlaco Monitor CAN SRD is required
- RadarEye can be extended with multiple sensor and camera units for all around detection and visibility
- Please contact Orlaco for advice and installation

YouTube

[Check our demo RadarEye videos on the Orlaco YouTube channel.](#)

RadarEye Sets

0403120 Set SRD Corner Rear

Active Rearview system for corner mounting.

- Including SRD sensors, brackets and terminator
- Interface Box CAN/SRD/camera is required (0256010 or 0504820)
- Cables, camera and monitor CAN SRD are not included

0403100 Set SRD Center Rear

Active Rearview system for center mounting.

- Including SRD sensors, bracket, cable master-slave (0301080) and terminator
- Interface Box CAN/SRD/camera is required (0256010 or 0504820)
- Cables, camera and monitor CAN SRD are not included

RadarEye Interface boxes

0256010 Interface Box CAN/SRD/camera

The Interface Box is designed to connect SRD sensors to camera and CAN SRD monitor.

0504820 Interface Box with Ext. speaker CAN/SRD/camera

The Interface Box is designed to connect SRD sensors to a camera, CAN SRD monitor and external speaker.

- Set consists of: External speaker and Interface Box
- Sound pressure speaker: 85dB (+/-3dB) distance 1m

RadarEye Cables

Cable M12 Green

Connection cable between Interface box and master SRD sensor or connection cable between slave SRD sensor and next SRD sensor.

0301050	5m	0301060	10m
0301070	15m	0301120	20m
0301130	25m	0301140	30m

Cable M12 Master-Slave Red

Connection cable between master SRD sensor and slave SRD sensor.

0301080	0,25m	0301020	1m
0301030	4m	0301040	8m
0301090	16m		

RadarEye Brackets

0401330 Bracket SRD Sensor Corner Rear

Mounting bracket for SRD Sensor for corner mounting.

- Stainless steel
- SRD sensor not included

0401320 Bracket SRD Sensor Center Rear

Mounting bracket for SRD Sensor for center mounting.

- Stainless steel
- SRD sensors not included

RadarEye Parts

Please contact Orlaco for advice.

0004310 SRD sensor CAN Horizontal

Short Range Detection (SRD) sensor for integration in active view system (RadarEye).

- Connectors position: Side

0004320 SRD sensor CAN Vertical

Short Range Detection (SRD) sensor for integration in active view system (RadarEye).

- Connectors position: Top / Bottom

0350110 M12 Terminator 120 Ohm

120 Ohm resistor for terminating CAN bus.

Spectrum Scanner wireless video transmitter & receiver

- Including powercable and two adjustable brackets for transmitter and receiver
- 8 video channels
- Full On Screen Display (OSD) functionality for system settings
- Please contact your dealer for further advice

0004061 RoundMax 150

- Omnidirectional antenna with horizontal orientation
- Maximum range 150m (dependent on surroundings)

0004091 LineMax 300

- Directional antenna with vertical orientation
- Maximum range 300m (dependent on surroundings)

Video control unit

0504730 Orlaco Smartbox

For connect and control the Orlaco AF-Zoom camera, Pan & Tilt and TIC camera.

- IP67
- Stainless steel housing

Video distributors

0407000 Orlaco video distributor

For connecting a second and third Orlaco monitor.

- 12V/DC
- Cables and connectors are not included

0407330 Video distributor 4 channel

- Cables and connectors are not included

Power supply

0004600 Power supply 9-36V

- Maximum cable length 200m
- Power input 9-36V/DC
- Power output 12V/DC

Pan & Tilt

0507061 Pan & Tilt max 6kg

- IP68
- Aluminium housing
- 24V/DC
- Weight 2,3kg
- Pan speed 30° per sec, tilt speed 10° per sec

0507040 Pan & Tilt max 12kg

- IP68
- Aluminium housing
- 24V/DC
- Weight 6,5kg
- Pan speed 32° per sec, tilt speed 12° per sec

0507100 Fastening plate

For quick mounting of camera on Pan & Tilt unit.

Control

0503500 Control unit Pan & Tilt

Power supply and control for Pan & Tilt unit (0507061).

- Joystick (0506500) is required
- Power input 24V/DC
- Aluminium housing

0502610 Handheld control AF (serial)

For activating of the Pan & Tilt / AF-Zoom / TIC camera.

- Zoom function
- Including 5m power supply cable

0502620 Control panel mount

Built-in keyboard for activating of the Pan & Tilt / AF-Zoom / TIC camera.

- Joystick (0506500) are not included
- Power input 24V/DC
- Dimensions: 140x116x80mm

0506500 Joystick

- Built-in
- Operating temperature between -30°C to +75°C
- IP40
- Telemanique

Digital MPEG2 video recorder

0000200 Easysolid Recorder

- CompactFlash storage
- Compact stainless steel housing
- Video loop function
- 10-36V/DC
- Automatic timestamp
- Including 32GB CF-card for max 72 hours of storage and CF-card reader

0407100 DVR 4 Channel

- Total resources: 4 channels D1 at real time (100fpa / 120fps)
- Supports 2.5" 1 TB hard disk storage and SD card for mirror recording
- Built-in GPS, WIFI and 3G

Cable disconnection sets

0351070 7p

0351130 13p

- Watertight
- With caps

0351100 10p harting

- Watertight
- With caps

Interconnection cables

0304020 Cab cable

- 1 x coax + 5 x wire PVC Ex
- Including 4p molded male connector & 10p harting female
- Operating temperature between -40°C to +85°C

0303630 Spiral interconnection

3,5m spiral cable between tyre carrier and adjustable bumper.

- Oil and petrol resistant
- With double coax
- Including 10p harting plugs

0303740 Cable trailer

- 25m multi cable
- Including 4p molded female connector
- Including 10p harting male

Mounting means - LEDD monitor

Brand	Model	DDIN slot	Necessary mounting brackets
DAF	Euro 5 CF/XF	Yes	None
DAF	Euro 6 CF/XF/LF	Yes	None
Iveco	All models	No	0400610 or 0400600
MAN	All models	No	0400610 or 0400600
Mercedes-Benz	Actros Euro 5	Yes	0400610 or 0400600
Mercedes-Benz	Actros Euro 6	No	0400610 or 0400600
Mercedes-Benz	Other models	No	0400610 or 0400600
Renault	Euro 5 Premium / Euro 6 Renault T	Yes	0400610 or 0400600
Renault	Magnum	Yes	0400630
Renault	Other models	No	0400610 or 0400600
Scania	Long dashboard: Euro 5 / Euro 6	Yes	None
Volvo	Euro 5 FM / FE	Yes	None
Volvo	Euro 5 FH	No	0400680
Volvo	Euro 6 FM	Yes	None
Volvo	FL	No	0400610 or 0400600

0400610 Monitor mounting bracket

For assembly of the Monitor 7" LEDD.

- ABS + aluminium

0400600 Monitor mounting bracket flexible

For flexible assembly of the Monitor 7" LEDD.

- ABS + aluminium

0400680 DDIN Adapter

For fitting the monitor to a Volvo dashboard (FH/FM /FE).

- ABS

0400630 DDIN Adapter

For fitting the monitor to the dashboard of a Renault Magnum.

- ABS

Mounting means

0402320 Protective cover

Cover specially designed for the Compact Camera.

- Stainless steel housing

Camera extension brackets

Specially designed for the Compact Camera. Matches the hole pattern of the Compact Camera bracket.

- Stainless steel

0402250 Camera extension 155mm

0402270 Camera extension 250mm

0401270 Camera bracket

Compact bracket specially designed for the Compact Camera.

- Cap can be resprayed in the color of the vehicle
- Including mounting kit
- Compact Camera is not included

0403310 Shock-absorbers for Compact Camera

In situations where shock absorption plays a major role, we recommend that the specially developed shock absorbers are used when installing the Compact Camera.

0403400 Magnet Bracket Compact Camera

For quick mounting of Compact Camera on steel profiles.

2015500 Adjustable mounting bracket

- Length 132mm

2015600 Adjustable mounting bracket

- Length 190mm

ISO Certifications

All Orlaco products are manufactured according to the latest Quality Management System Standards:

ISO/TS 16949 : 2009

ISO 9001 : 2008

Additionally, all Orlaco products are manufactured according to the latest *Environmental Management System Standard*:

ISO 14001 : 2004

Type-Approval Certifications

Regulations 10 and 46 are used to determine the Type-Approval for **EMC** and **Indirect Vision** (Mirror Directive). **R46** describes mirror specifications for truck compliancy. Orlaco Frontview systems meet all these requirements. **R10** describes the **EMC** behavior of the Orlaco Camera and Monitor systems.

TÜV Automotive Certifications

The European Agreement concerning the International Carriage of Dangerous Goods by Road (**ADR**) demands additional equipment. Orlaco Camera and Monitor systems and connection cables comply with these regulations.

Compliance

Our Camera and Monitor systems are produced entirely in line with the **CE-marking** and the most recent applicable directives and product standards (e.g. **EMC**, **FCC**, **Machinery**, **R&TTE**). Orlaco products are compliant with **RoHS** and **REACH**.
