

The Jason's Cradle® MOB systems

Who uses it?

The Jason's Cradle® MOB system is used globally in every military, commercial, rescue, and leisure area within the marine sector. The commercial units are fully SOLAS approved and for many years have been and continue to be the most respected MOB recovery, embarkation/disembarkation and evacuation system in the world.

Why do I need it?

Jason's Cradle® is designed to retrieve people quickly and horizontally from the water, thus reducing the possibilities of “dry drowning” now more commonly known as Circum Rescue Collapse.

The horizontal lift for a MOB has now become critical in the modern marine world and by using the Jason's Cradle®, not only is this achievable, but it is one of the safest and quickest methods of retrieval for conscious and / or unconscious casualties.

Using Jason's Cradle® as your preferred MOB recovery system allows operators to retrieve casualties who are unable to assist themselves due to injury, or high freeboard.

How do I determine the type & size of Jason's Cradle® to suit my vessel?

The **Standard** unit is suitable for most vessels with up to 3m freeboard and is offered in three width options.

The **FRC Kit** is suitable for all Fast Rescue Craft and is offered in two width options

The **Stretcher** unit is suitable for high sided vessels, diver recovery and quayside rescue and is offered in two sizes

The **Scramble Net** is suitable for high sided vessels, rescue zones and mass recovery/evacuation

Our **Bespoke Service** offers the flexibility to meet all your requirements by tailoring the Jason's Cradle® system to suit any vessel where the dimensions are outside the above provision of stock units

Bespoke Services

Bespoke Services

We can provide an MOB solution to meet your individual needs.

The unique design of the Jason's Cradle® MOB system enables it to be customised and manufactured to suit almost every application requirement.

Jason's Cradle® is fully SOLAS approved and guaranteed against manufacturing defect for three years, excluding clips, strops, hauling lines, stowage bags and other additional fittings that carry the usual 1 year manufacturer's warranty. Once the product is older than 3 years, it is important that it is serviced annually by Land and Marine's authorised service centres in order to maintain its high quality standards. If it is serviced, modified or altered in any way by the owner/operator or another non-approved body, Land and Marine disclaim all and any liability for any failure of the product to operate correctly or other problems or defects with the product except for liability which cannot be excluded by law.
