Press release

December 19th, 2017, Hokksund, Norway
(For immediate release.)

Brudeli Tech Holding AS have completed the sale of the patents known from the Leanster vehicles Brudeli 654L and 625L. The buyer is Yamaha Motor Co., Ltd., Japan which is a world-class leading motorcycle and powersport manufacturer.

“I see this as an incredible honour that Yamaha have decided to acquire this technology that we started to develop here in Norway” says Geir Brudeli inventor and owner of Brudeli Tech Holding AS. He also states that: *“Knowing the competence, knowledge and passion of Yamaha it will be exciting to see their future products.”*

The history of the Norwegian company Brudeli Tech Holding AS goes all the way back to 2001 and the concept vehicle was unveiled at the EICMA 2005 at a time before this new and growing market of leaning vehicles with two wheels in the front was established.

A very competent group of partners and investors did contribute from the very early years. A large thanks to all of them!

Since 2010 a major part of the day to day business have also been to provide mechanical and mechatronic design consultant services to a major automotive system supplier.

Brudeli Tech is located at Eiker Næringspark (<http://eikernaeringspark.no/>), an industrial estate which is continuously modernised and growing. Eiker Næringspark was founded by entrepreneur Svein Rust who also was a mentor and investor in Brudeli Tech in the start-up phase.

(Pictures (also high res. pictures) and more information can be found at the company's web-page: www.brudelitech.com. Whenever these pictures are used, please always refer to photographer Rune Baashus and his web address, www.baashus.com.
