### **Information Bulletin WUSV Board of Directors – Hair Varieties & Recogniton of Diagnostics and Results**

Ladies and Gentlemen:

Please allow us to use this opportunity to draw your esteemed attention to the fact that interbreeding of the two hair varieties of stock hair and long stock hair with undercoat are a clear breach of the breed standard for German Shepherd Dogs.

We kindly ask you to explicitly follow this requirement. In the past and very much to our regret we noted that this basic rule in connection with the breeding procedures of German Shepherd Dogs is still not fully complied with in some of our member countries.

Furthermore, did we learn that in some WUSV member countries that are represented within the community of the WUSV with two clubs, at times not all medical diagnostics and show- as well as training results from the respective other club in their country are mutually recognized. This is also a clear violation of the WUSV statutes and we kindly remind the countries affected of the necessity for close cooperation within their state territory.

Thank you for your kind attention. In case of doubt, please contact us.

With kind regards,

Hartmut Setecki  
WUSV Secretary General
